

TRANS SIB

Company History:

- The story of TRANS SIB ATC Air Service GmbH begins on March 20th 2001 with the opening of the Head Office in Nuremberg.
- In August 2002 a subsidiary was officially opened at Frankfurt-Hahn Airport. The subsidiary handles import and export.
- In September of 2003 TRANS SIB expands by buying three vehicles of their own.
- In April of 2004 TRANS SIB carries out their first tours to Frankfurt, Nuremberg and Munich themselves. Since then the company has been growing constantly and expanding its motor pool.
- Currently the TRANS SIB motor pool consists of 23 semi cabs and a small transporter. The semi trailers can be divided into mega trailers and mega cooler units both equipped with Roller Beds. Furthermore, GPS is available in all vehicles.
- During this time the staff has grown from 5 to 38. Specialized software has been developed and implemented enabling online tracking of freight transport.

Advanced IT

Every vehicle in TRANS SIB's fleet is equipped with an on board computer that enables us to exchange information between vehicles and the head office. Our staff is well informed of current position and status of each truck at all times. The ability to communicate with drivers in real-time, enter orders and plan trips offer you, our valued customers, great reliability.

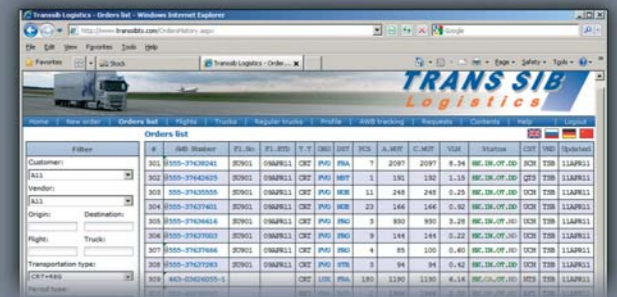

Our clients can easily track & trace consignments through an online tracking facility by simply entering their AWB number. Availability of real-time status updates on your shipment throughout the full lifecycle of your shipment - So, you can see exactly where your goods are at any time. Customer support and service is our highest priority.

Usage of modern and effective logistics solutions in transportation planning enables our staff to enter external orders for carriage and work out the most efficient plan for the delivery of goods. All data, including PODs, is scanned and stored electronically, which allows easy access for copies to be sent to customers via email and fax. Specialized user-friendly software provides single workspace for TRANS SIB partner airlines, customers, cargo agents, freight forwarders and warehouses.
